

My Days in Split

Time flies, I am now going to leave Split, where I spent 4 months here as an exchange student between the University of Split and Ningbo University under the Erasmus+ program. Here I would like to tell my story to those who will come and also who are considering coming to the city of Split and the University of Split.

I'm a PhD student from the Faculty of Sports Science of Ningbo University. Just like everybody else, I was confused about which University should I go to when applying for the Erasmus+ program. And then, I was deeply attracted by the charm of Split when I saw the scenery of this city (seaside scenery). Besides that, I really admire the University of Split because it has a prominent reputation in the field of sports science, which is also my major. So finally I decided to apply to this university to start my exchange study.

Talking about my study at the Faculty of Kinesiology of University of Split, I would like to express my sincere gratitude to Prof. Goran Munivrana, who helps me a lot with my study and my research during that time. The Faculty of Kinesiology has provided me with full support for my research plan. In addition, I would also like to thank all the administration professors and teachers in the international student office (special thanks to Prof. Ana Penjak and Miss Ana Marinović), I wouldn't have had such a great experience without all your help and support.

Talking about the fun time here, I really enjoy the sunshine and also the seaside scenery. During the program, I made many new friends, they are all kind and polite, and all the teachers treat us very well, we hung out, shopping, have meals together, share funny things, just like family. I don't want to say goodbye to them, I hope all my friends here can be happy and healthy forever, if someday you came to China or I went back to Split, we can have fun again.

Lastly, I would highly recommend all of you who will apply for the Erasmus+ program to take the University of Split under your consideration. I'm sure it will be an unforgettable memory in your life.
