

Pozdrav svima! My name is Nataša, and here I am, presenting you my story. I am from Serbia and currently in my fourth year, pursuing my bachelor's degree at University of Belgrade at the Faculty of Organizational Science and Technology.

Considering my wandering soul, it is not strange why I applied for Erasmus once again, since I already was one semester in Poland. Changing environments, meeting new people, perceiving their mentalities and cultures is something that I will always strive for. It is not also strange why I chose Croatia, since it is in the top 3 most beautiful countries in Europe in my opinion. Split is really wonderful city. 'It gives me chills' from the first day I came here. Except that, people are easy going and very nice to talk to. Talking about University and EFST faculty especially, I have just words of praise. It is really modern and the most beautiful one in Split, for me. It has everything one faculty should have. The professors are committed and willing to help, also in this time while we are on the online mode of learning. The truth is that my Erasmus friends here and I are very sorry about the fact that when we should write the best memories, outbreak of pandemic happened unfortunately, but we stayed here, supporting each other and drawing some lessons from this experience. So #stayhome & #keepitpomalo
